ELECTION RETURNS.

Favorable returns continue to be received from Ohio—the Democrats have undoubtedly carried the State by a handsome majority.

From the N. Y. Evening Post.

The news from Ohio is of a more gratifying description than we had any right to expect. The only material loss which the democratic party has sustained is in Muskingum county, where, in consequence of a schism in our ranks, the Bank candidates succeeded by a large majority. This county, in the Presidential election in 1832, gave a majority for Henry Clay of 229 votes. It is now said to have given a majority for the opposition candidate for Governor, of 1287, and for the opposition candidate for Congress of 1203 votes. The returns from all the other counties which have been heard from show an increase of democratic strength.

In Franklin County our majority for Lucas is 111, and for the democratic candidate for Congress, 125. Four towns are yet to be heard from. In 1832, the opposition majority, on the Presidential question, was 351.

In Jefferson County, our majority for Governor is 384, and for Congress 130.

In Hamilton County, our candidate for Congress has 112 majority.

In Belmont County, our Congress ticket has received a majority of 41 votes.

In Columbiana County, our Governor's ticket has a majority of 882—and our Congress ticket of 1021.

In Carroll County, Lucas has a majority of 117, and the opposition candidate for Congress of two votes.

From St. Clairsville we learn that Mr. Bell, the present opposition member in Congress, is beaten by Mr. Kennon, Democrat, 41 votes.

In the Western Reserve, there is a great Democratic gain. The Bank men set down their loss there at 1600.

Georgia.—We have, says the New York Evening Post, before us a letter from a source of the highest respectability, dated at Savannah, the 14th, which says—“From the election returns received here this morning, there is no longer any doubt of our having elected our entire administration congressional ticket, and a very decided administration legislature in both houses, giving us a majority in joint ballot of from fifty to sixty—certainly not less than fifty-five. The contest has been altogether for and against the administration and the succession to the Presidency. The nullifiers mouthed a great deal about Van Buren.”

Pennsylvania.—The Pennsylvanian confirms the truth of the returns heretofore published. It is ascertained that the democrats have elected their candidates in the 1st, 3d, 5th, 7th, 8th, 9th, 11th, 13th, 14th, 15th, 16th, 17th, 19th, 20th, 23d and 25th districts—and the Bank men in the 2d, 4th, 6th, 10th, 12th, 21st, 22d and 24th districts. The 17 democratic districts send 17 Representatives, and the eight Bank districts, 11. Last year, the representation of the State stood 17 Bank and 11 democratic—we have fairly changed weakness for strength. The majority in the State will probably not fall short of twenty thousand!

Baltimore Regenerated.—The Republican of Tuesday furnishes returns of the election in that city for Mayor and Common Council men: Mr. Hunt, the Jackson candidate for Mayor, was elected over Mr. Small, the Bank candidate, by a majority of 1053 votes. In the Common Council the Jackson men have an equal number with their opponents. The two candidates to represent the city of Baltimore in the legislature of Maryland who were supported by the opposition party in the late election, were in truth not wholly opposition men, and received a very considerable number of votes from the Jackson ranks.

South Carolina.—Letters from Charleston state that the Nullification ticket in that city for members of the Legislature, has succeeded by a considerable majority.

Democratic Gains.—Six members of Congress in Pennsylvania, six in Georgia, and one in Ohio as far as heard from—making a change of TWENTY-SIX VOTES!

Not Slow.—A meeting of the Wool Growers, of Hampshire County, has been called, for the purpose of selecting a Corresponding Committee, whose duty it shall be to furnish correct information of the value of this great staple, and thereby “prevent imposition from speculators and panic makers.”

U. S. CIRCUIT COURT.

(Thursday, Oct. 23.—Present, Hon. Judge Story, presiding; Andrew Dunlap, Esq. District Attorney; Abraham Moore, and Horatio Shipley, Esqrs. Counsel for the Defendants.)

Revolt of the Crew of the Merrimack.—John Davis, Samuel Ashton, William Douglass, Robert Stewart, George Myers, Thomas Hudson and Isaac Wilkins, seamen, severally pleaded not guilty to an indictment for committing a revolt on board the Merrimack, while on her outward voyage from this port to Rio Janeiro, on the 28th of August last. It was proved on the part of the Government in this case, that on Thursday, the 28th of August, the fourth day out, during a gale, in the forenoon, the defendants went aft, and refused to take in sail, or perform any other work, unless the captain, Samuel Eldridge, would agree to return with the vessel to Boston, assigning as a reason for their refusal to do duty, that they had been to work at the pumps all night, and they did not consider her seaworthy. They adhered to this determination, and Captain Eldridge was compelled to wear round, and steer for Boston, where the Merrimack arrived on the 2d of September. The mate testified that “the Captain was much worried at being obliged to return, and sometimes said he felt bad enough to jump overboard.” The crew were peaceable and good, and always prompt before the difficulty complained of, which happened in about lat. 40: long. 61.

In reply to a contrary position, taken by the District Attorney, Judge STORY ruled that the defendants had an unquestionable right to introduce any evidence tending to show, that the ship was unseaworthy, as a perfect justification of their conduct, in compelling the captain to break up his voyage.

John Hodges [2d mate]—I went on board on the 18th of August—she made a good deal of water, while laying at the wharf—from 7 in the morning till 6 in the evening, she made 14 or 15 inches. She sailed about half an hour after the crew came on board—after wet sailed, she was pumped about once an hour, because the water was gaining—when passing the fort, the crew first spoke to the captain about her being unfit. Captain told me not to tell the men how bad she leaked, but to say that she had stood 24 hours, without pumping, as a reason why she had so much water in her in the evening, when she had in fact been pumped out in the morning. Before we passed the light, 2 or 3 of the crew wanted the others to agree to put back, but the captain refused, but said he would put back if the leak increased. On Wednesday night, the gale commenced, and the leak increased—they pumped all the time that they were not employed in taking in sail. The pumps were so much out of order, that they had to stop every five minutes, to clear the boxes of chips, gravel, &c. After pumping an hour, there was 19 inches of water in her—the men exerted themselves as much as they could do. The rigging was not fit to stand the racket of a voyage. Witness considers himself more bound to speak the truth when under oath, than when not.

John Lang—has been to sea 26 years—before the Merrimack sailed, met the mate, who said “she leaked like the devil,” and would not go in her, if he had not been out of employ so long, and had a family. Witness would not trust his life in her with such rigging, &c.

John G. Povers had examined her 3 years ago, as an agent for the insurance offices—never knew a vessel to sail out of this port that looked so bad—she was built in 1805. No essential repairs has been made to her since.

John D. Howard—caulker and graver—acquainted with ships 27 years—examined the Mexican about a months since—her water ways strained—seams very much open—starboard butts started three fourths of an inch—the ship generally bad—rotten—she was iron-sick—stanchions strained open—wanted caulking all over—bottom open underneath the sheathing next to the stern port—sheathing patched forward—I never saw so bad a vessel go to sea in my life.

William Lovering had an idea of purchasing her—judged her to be unseaworthy—\$1000 spent in repairs would not essentially improve her.

At this stage of the trial Judge STORY interposed, and raised the question, whether, even if the government could bring testimony of the seaworthiness of the vessel, there was not evidence enough to the contrary to lead fair and honest men to doubt of their safety under the circumstances in which the defendants were placed? His honor strongly inclined to the opinion that there was, and though he would not form any opinion respecting the vessel, he was clear that the defendants might have acted *bona fide*, upon the premises, and therefore, with no evil intent, though they might have made a mistake as to their danger.

“I am strongly opposed to constructive crimes,” continued Judge STORY, “and even if the jury, in this case, should convict the defendants, I should be inclined, respecting the sentence, to extend to them every possible indulgence, for acting in such a manner, as I think it very possible I should have done myself in similar circumstances.”

In consequence of this intimation from the Bench, Mr. Dunlap entered a *nolli prosequi*, and the defendants were discharged from custody.

Snow.—They had quite a snow storm in Bangor on the 14th inst. It continued falling for about 12 hours, and reached the depth of about five or six inches. The Republican says the oldest inhabitants have never known so severe a snow storm so early in the season. The weather, which had been unusually cold, has moderated since.

Bets.—A bet of one thousand dollars that the city of New York will give two thousand majority to the Democratic Party, and two thousand dollars that the State will give ten thousand majority for the same party, is offered in the Providence Herald.

Amount of specie imported into the United States from December 1, 1833, to October 18th, 1834, \$18,132,706.

Amount of gold coined at the mint up to October 18, - - - - - \$1,900,700
Remaining uncoined, - - - - - 663,800

Dr. Henry Parker, of Grafton, declines being a candidate for Senator on the Antislavery ticket.

From Rio Janeiro.—By the Brig Susan, at Baltimore:

Rio Janeiro, Sept. 7th.—The stock of Flour on hand is supposed to be about 15,000 bbls of all kinds, some of which was very inferior. There was a large stock of wheat in the market, which kept the price of Flour down. Flour 19/50 to 19/80—Coffee 2/45 to 3/75—Exchange 39/4 a 40 per mil.—Spanish Dollars 14/30. No political news when the Susan sailed.

POLICE COURT.

HOMICIDE.—**Jabez W. Wilson**, a boy, about 15 years of age, was examined last evening, upon a charge of shooting **Horatio N. Pierce**, near the Ship-yard, at South Boston, on Wednesday afternoon. The facts respecting this melancholy and untimely affair appeared from the testimony of the witnesses, and the boy's uncontradicted statement, to be as follows:—Wilson had possessed himself of his father's fowling piece, without his consent, with the intention of “going a gunning” in the afternoon, and in the meantime secreted it in a barn; but afterwards, thinking it was dangerous to leave a loaded gun in such an exposed situation, he took it out, and discharged it without looking to see if there were any one within its range, and unfortunately lodged the entire charge into the body of Mr. Pierce, who had at just that moment turned into the passage way, where Wilson was standing. The latter made no attempt at concealment or evasion at the time of the accident. Pierce was immediately conveyed home, expressing the too true conviction of his certain death. He lingered from 2 o'clock on Wednesday afternoon till 4 yesterday morning, when he died.

There were 5 holes, made by a slug, in the cavity of the stomach; 25 shots were lodged in the abdomen; 1 in the chest; 2 in the urethra; 48 in the right arm; 18 in the right thigh; 2 in the right leg; 29 in the left thigh; and 4 below the left knee.

Notwithstanding the great probability, that the firing was purely accidental, the Court was compelled, by the express language of the statute, to commit young Wilson to jail, to await the doings of the Grand Jury, for the November term of the Supreme Court. Mr. Pierce has left a wife and three children.

Foreign Items—from the N. Y. Sta.

Poland.—The most atrocious cruelties are still being perpetrated by the cruel Autocrat of Russia against the unfortunate Poles. The nobles are compelled within two years to produce their titles, or be condemned to menial service in the Russian army, or to labor in the mines of Siberia. Several young students, in whose possession was recently found a volume of Viletynska, have had their heads shaved in public, and one of them, aged 12, scourged to such a degree, that he died a few hours after. A beautiful Polish girl at a boarding school at Warsaw, aged only 15, who was found playing the National air, “La Pologne n'est pas encore perdue!” was seized by the governor, dragged to the guard house, and there whipped and violated by the Cossacks so shockingly, that she died of shame and grief. Many of the Poles, in consequence of their misery, have committed suicide.

The proportion of persons educated in the State of New York is stated, in the French papers, as greater than any other part of the world. Thus in New York as 1 to 4—in Scotland 1 to 10—Bohemia as 1 to 11—Holland 1 to 12—Austria 1 to 13—England 1 to 16—France 1 to 17—Portugal 1 to 84—Russia 1 to 954.

As early as 1550, Antwerp frequently had 2000 vessels in port, and 500 large vessels in foreign trade, with a population of 200,000. Since 1815, this great commercial city has rapidly declined. It is now resuscitating, and a project is on foot of a railroad from that city to Cologne.

In Copenhagen there are but 2200 electors, and 1000 persons eligible to office. On the continent of Europe the elective franchise is a mere mockery.

By the last census of Palermo, that city contains 172,825 inhabitants.

One day too soon, Mr. Atlas!—A half bushel, or so, of Saturday morning's Atlases were put into circulation in this vicinity on Monday, containing in flaming CAPITALS, the glorious Whig victory in New Jersey, &c. &c. We did not learn whether they were freighted by the Packet, or by Uncle Sam's mail, but in either case they most certainly came to a bad market; for they could hardly be shoved round, into the hands of those who would consent to take them, before the tables were turned; and the “glorious news” that New Jersey, was indeed “for the Constitution” and against the Bank, made the hurried attempt to circulate the premature and false accounts of the Atlas along the shore of Cape Cod, look like rather a sorry affair.—**Barnstable Pat.**

The Fall River Monitor of Saturday says that “the Committee appointed by the Legislature of Massachusetts at its last session to survey a route for a ferry and road leading from this place to Providence, met at the Pocasset House on Tuesday. They finished their survey and examination of witnesses on Thursday. The contemplated road and ferry, as prayed for by the petitioners, is to commence near the new Pocasset Print Works establishment, and after crossing the river to run in nearly a direct line to Barneysville. It is said that the new route will shorten the distance between this place and Barneysville about 2 1-2 miles.

This road, should it be made, of which there is some doubt, we think, for a long time yet to come, will no doubt be a public convenience.”

The Alarm of Fire. on Wednesday evening at 6 o'clock, was occasioned by the burning of a two story house at Newton, a few rods in the rear of the Rev Mr. Homer's meeting house, owned by Mr. Wm. Jackson. A considerable part of the furniture was destroyed.—The house was insured at the Middlesex Mutual Insurance Office.—[**Briggs's Bulletin.**]

United States' Dragoons.—A correspondent writes us, says yesterday's Philadelphia Herald, from Fort Independence, Mo. that “three companies of the United States Dragoons had arrived at cantonment Leavenworth, and have taken up their head quarters for the winter. The troops are generally in good health, though somewhat jaded by their long and tedious march through the Pawnee and Osage country.”

Cholera in its mild form lately made its appearance at Fortress Monroe, and prevailed to a considerable extent: out of 100 cases only 8 deaths occurred. It has been thought advisable to disperse the troops for a little while.

Fraser, the proprietor of Fraser's Magazine, was lately challenged by Mr. Duncombe, M. P. in consequence of the publication of a most abusive article.—Fraser had him bound over to keep the peace.

A large tavern and wine establishment, in Brydges street, London, opposite Drury Lane Theatre, has been lately christened by its proprietor, THE SHERIDAN KNOWLES.

Garlick.—In June, 1771, Mr. Fisher, superintendent of the Empress Catharine's theatre at St. Petersburg, offered Mr. Garlick two thousand guineas for four performances at that place, which were refused.

King William has been graciously pleased to approve of Mr. Thomas Dennison as Consul at Bristol for the United States of America.

Canal Tolls. During the week ending the 11th instant, the amount of tolls received on the New York State Canals in Pennsylvania, was \$9,293 18.

Lieut. Blanchard of the U. S. Navy, and Mr. O. Sullivan, a law student, were lately prevented from fighting a duel near Bladenburg.

The Cholera is spreading with great fatality in Washington, North Carolina.—**Phil. U. S. Gazette.**

A single track of the Philadelphia, Germantown and Norristown rail road was opened on Saturday last.

CONGRESSIONAL NOMINATION.

At a meeting of Delegates from the several towns in the 4th Congressional District, held at Concord, October 8th, 1834, **JAMES RUSSELL**, Esq. of West Cambridge, was unanimously nominated as the Democratic Republican candidate for Representative to Congress from this District—and it was

Voted that the proceedings of the meeting be signed by the Chairman and Secretary, and published in the Democratic papers of Middlesex and Suffolk.

JOHN WADE, Chairman.

**HAMILTON'S PATENT SAWING & BOR-
ING MACHINE.**—The subscriber, as Agent for the pro-
prietors, will sell the right for using and vending these Ma-
chines in the States of New Hampshire and Vermont. The
machine is designed for sawing and boring Wood or Timber,
and is claimed by Col. Hamilton, in his specifications, to be
an improvement in the mode of sawing *without* the use of
circular and curved segments, mitre joints, trunks, &c., boring
of hollows and hubs of wheels, and generally for sawing circular,
curved and plain surfaces.
The machine is propelled by steam, animal, or water power.
One of the machines is at present in operation at the Steam Fac-
tory in Pitts Court, where those interested are desired to call and
witness its operation. The right for the above States is now
offered for sale, and any one disposed to make a profitable in-
vestment, has now a rare opportunity. J. A. SILLOWAY,
